DELIVERY PERFORMANCE AUDIT

Last mile delivery audit

Are we failing specific regions, or the whole country?

6.8%

missed the promised day

12 days

early, the typical package

Regional

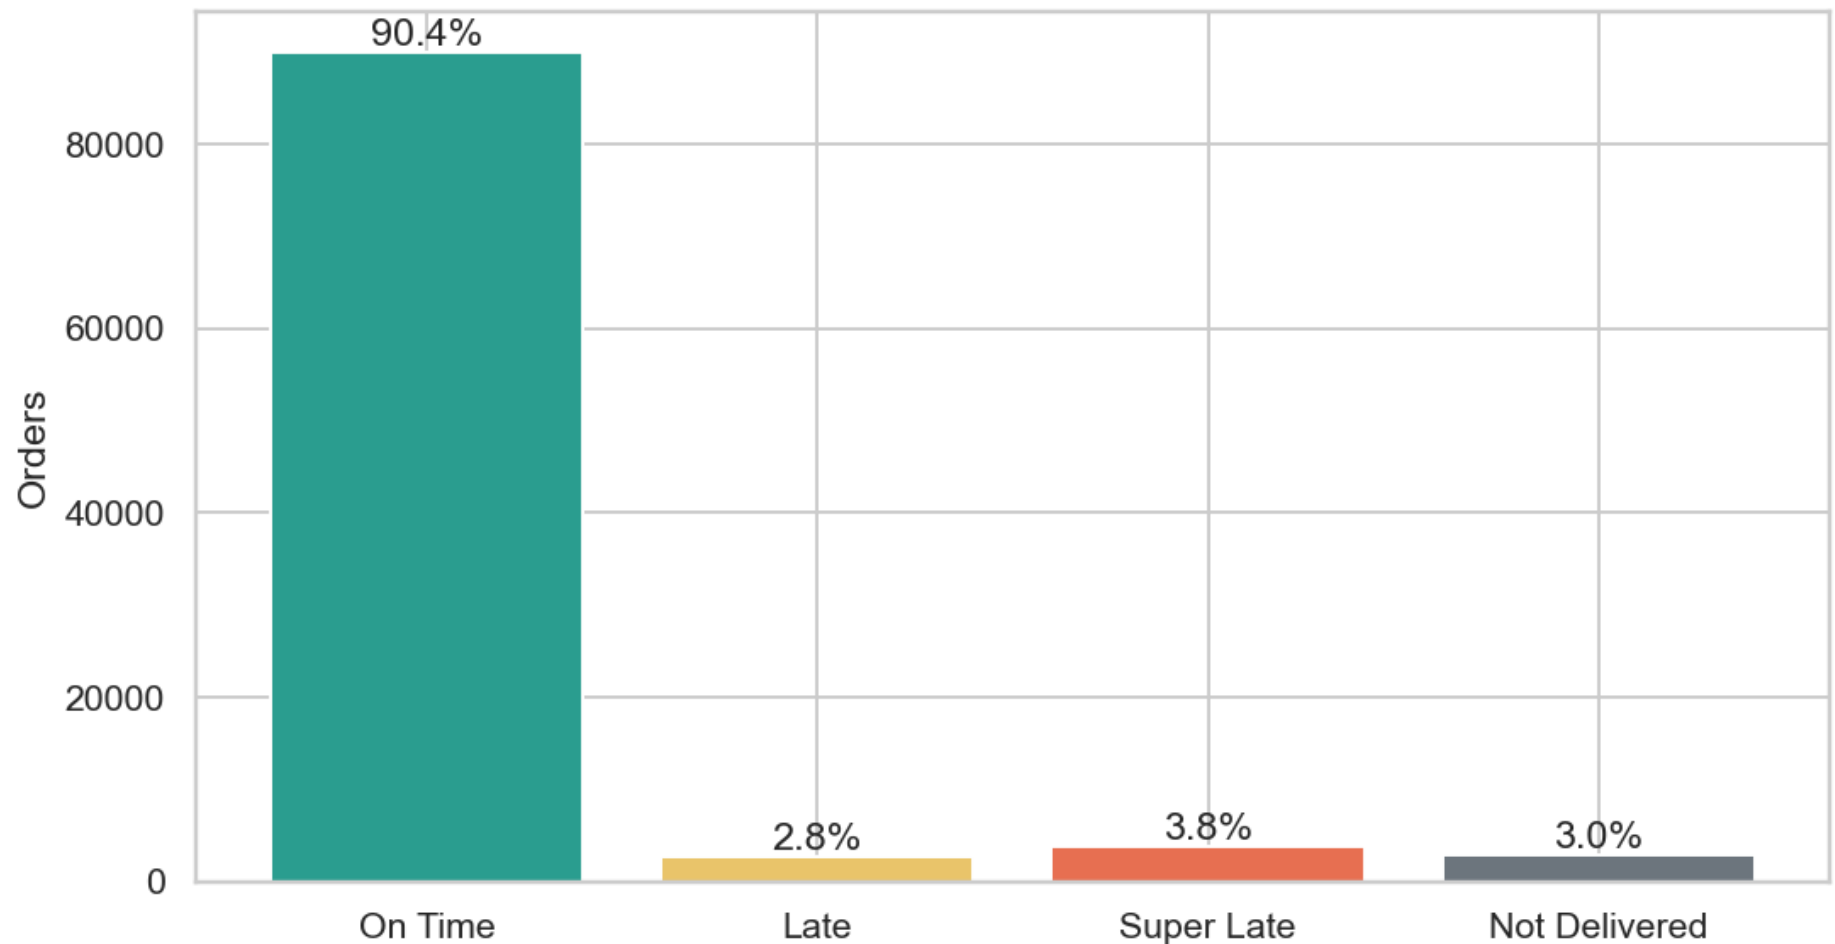

the Northeast and Rio

Olist public orders · September 2016 to October 2018

The country is mostly on time

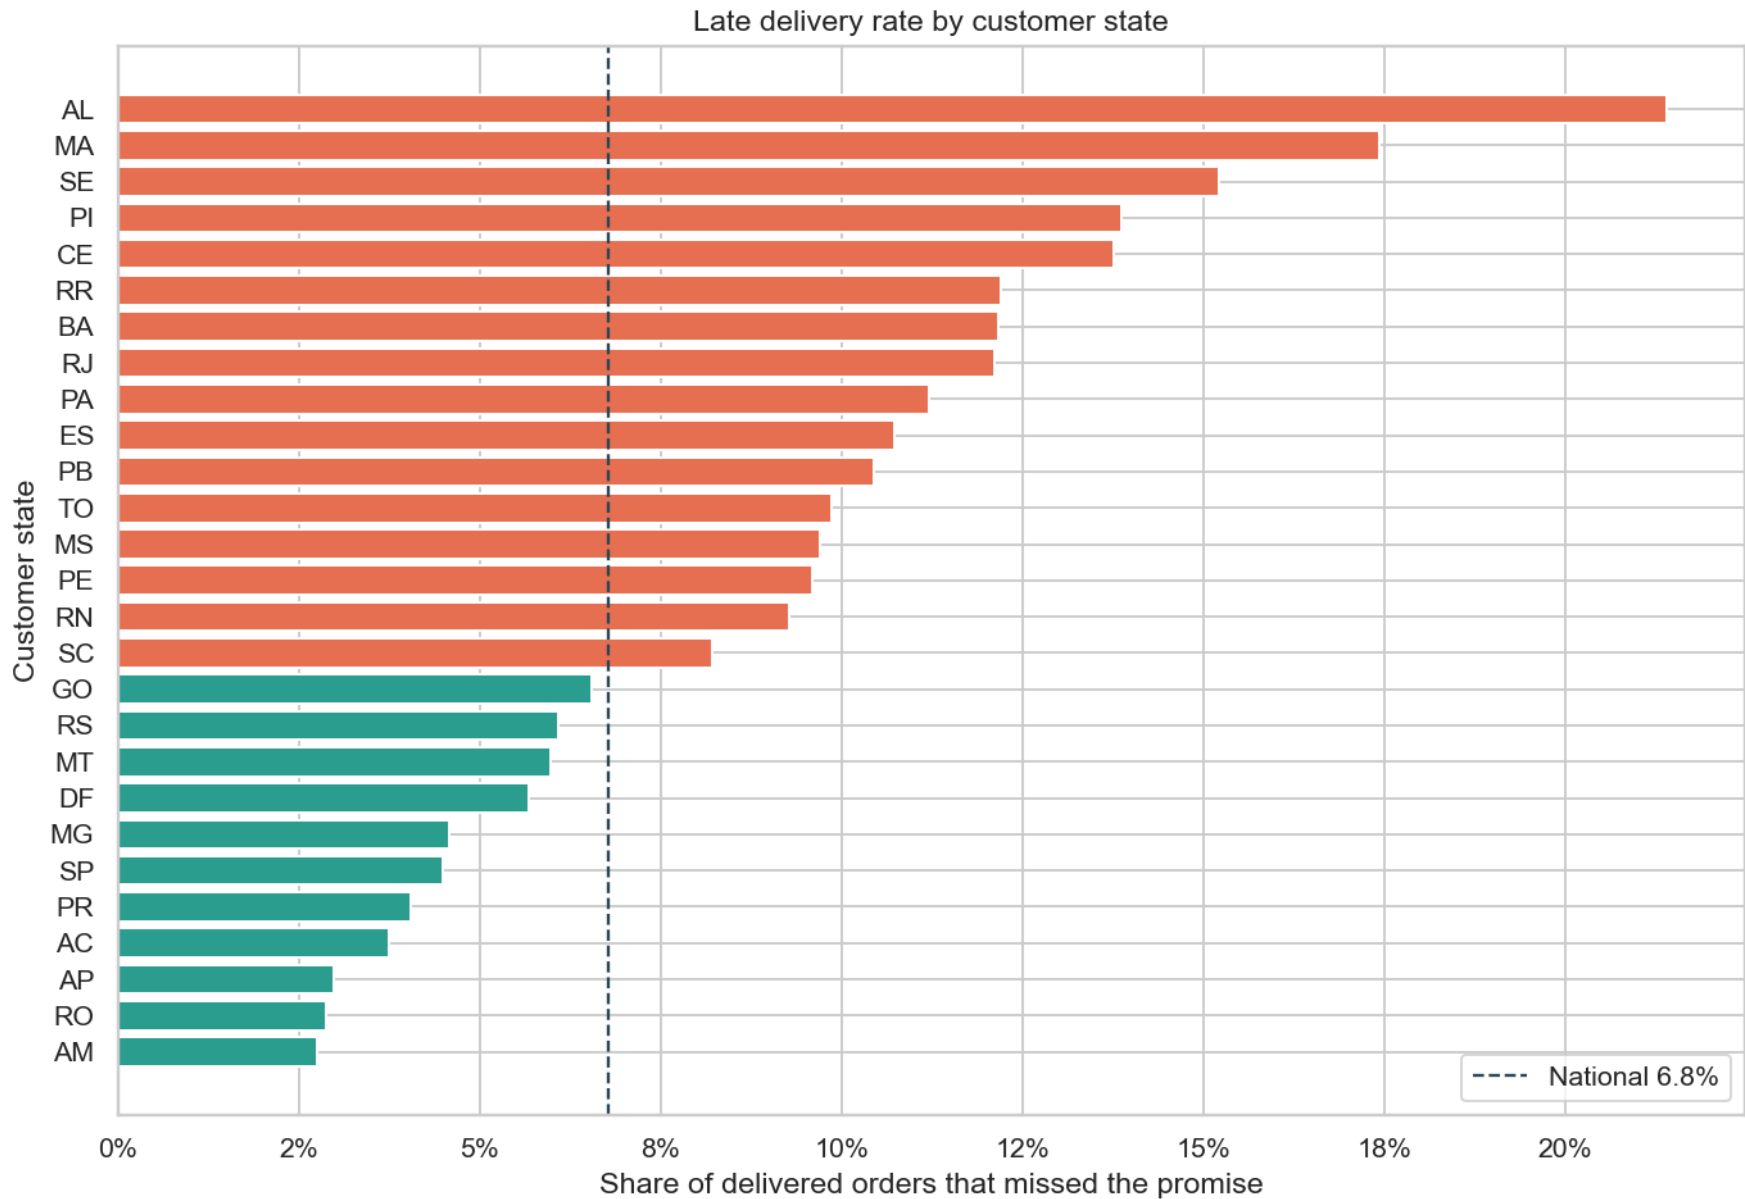

Late means the arrival day is after the promised day. Super late means more than five days.

Delivery status of every order

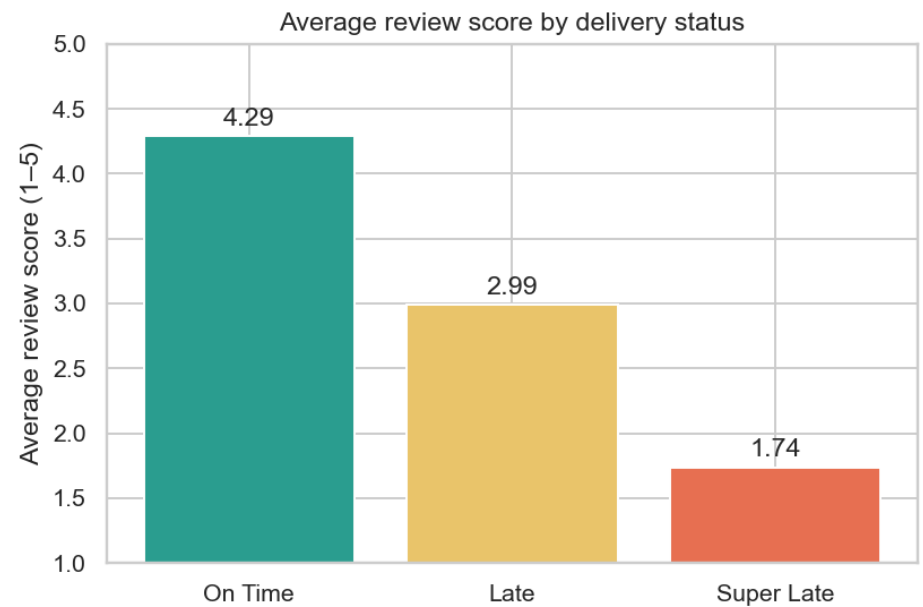

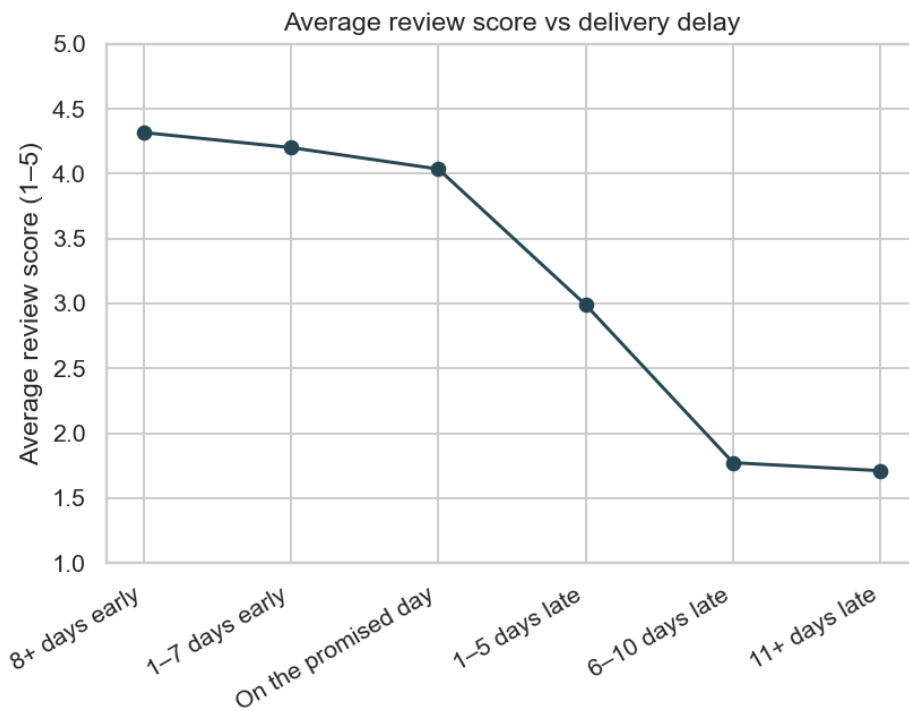

The miss is in some states

The dashed line is Brazil, 6.8% of arrived packages. São Paulo is 4.5% on 40,494. Rio is 12.1% on 12,350.

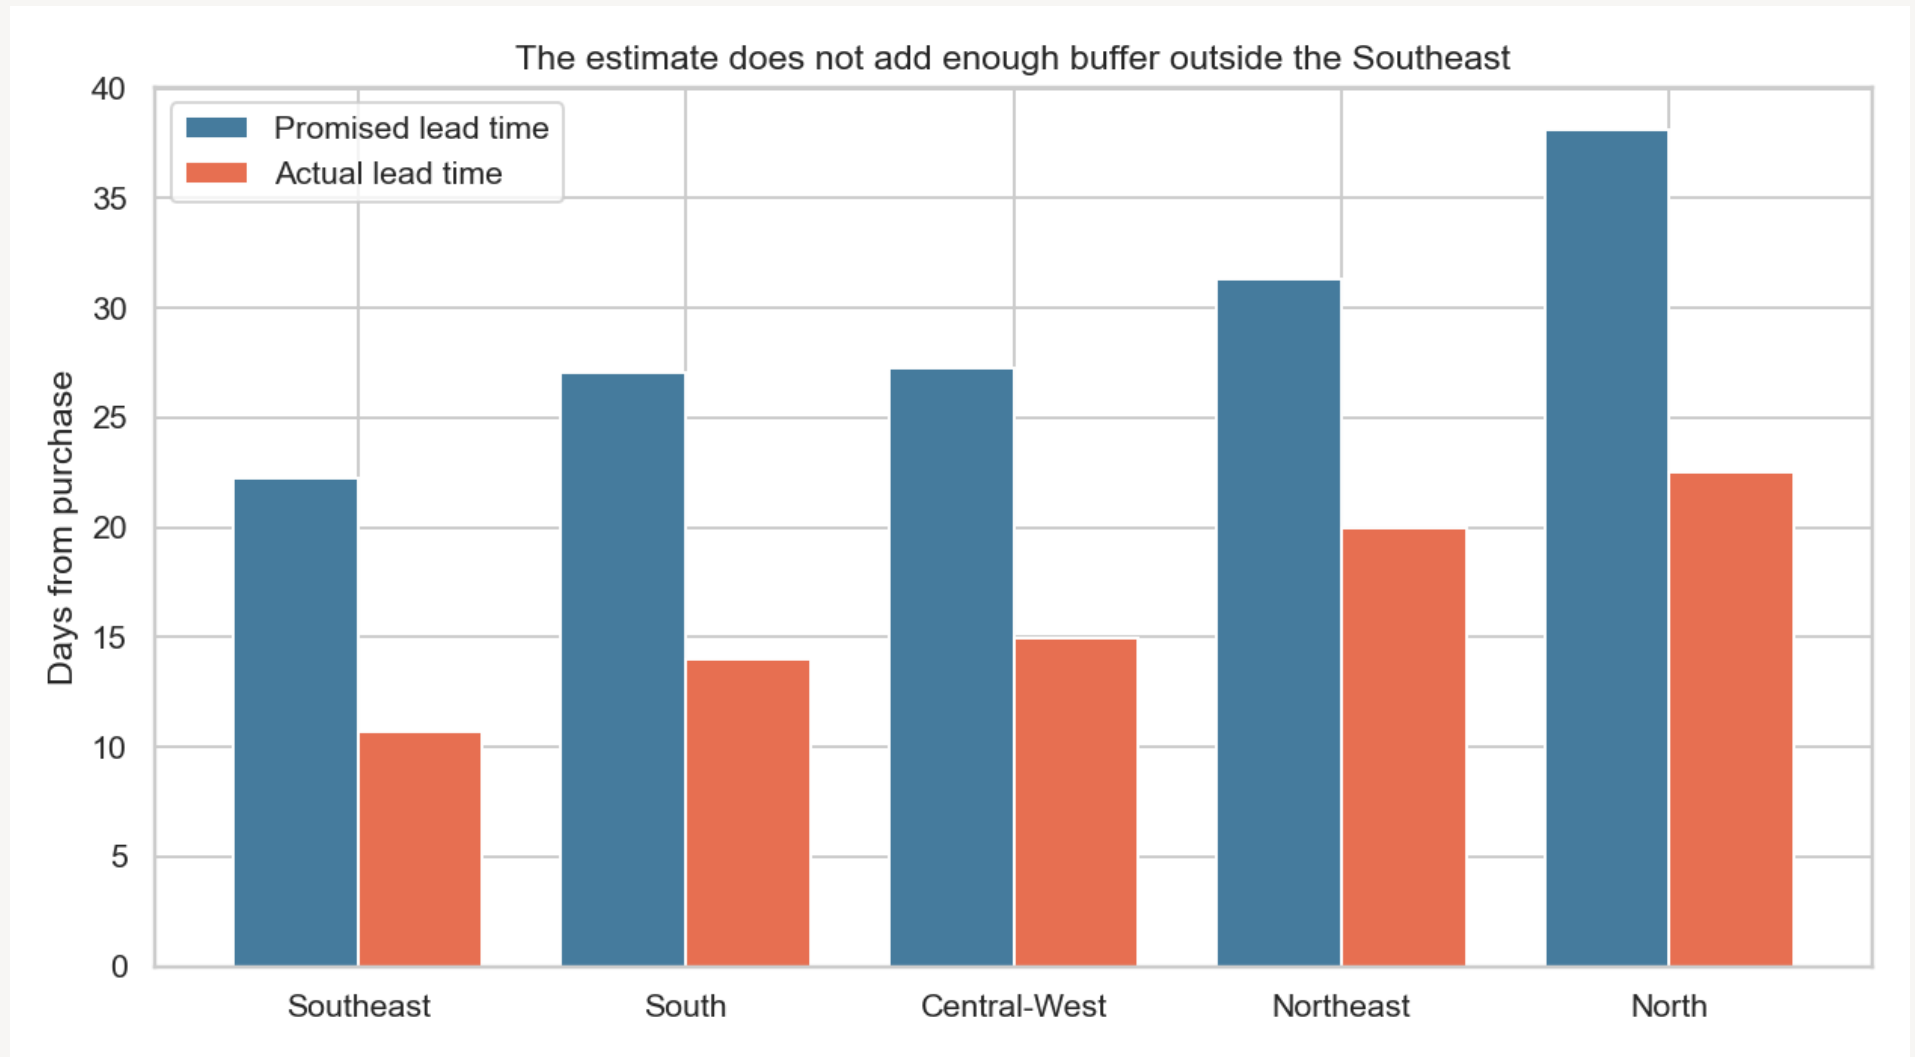

A missed day sits next to a lower score

4.29 on time, 2.99 when one to five days late, and 1.74 when more than five days late.

The longer trip was not given a later day

The Northeast was promised about 31 days for a trip of about 20. The cushion stayed near 11 days, the same as the Southeast. The North was given a wider day and misses less often, 8.6%, on a longer road.

WHAT TO DO FIRST

Widen the date where the trip is longer

The promised day fails in the Northeast and in Rio. It does not fail for Brazil as a whole.

- 01** Give a later day in the Northeast and in Rio de Janeiro.
- 02** A package that leaves the seller's state is 8.0% late, against 4.5% when it stays.
- 03** Do not rank a small state by rate alone. Alagoas is 21.4% on 397 deliveries.
- 04** A later date will not clear every weak review. Most weak reviews are still on time.

2,971 orders have no arrival. They stay in the file and are left out of the 6.8% rate.
